Link:- <https://zoom.us/j/7820061386?pwd=NGlWYjRlVjNBOldvc0YURyYmYrZz09>

Date:- 22nd January 2022 **Time:-** 2:00 pm to 3:30 pm

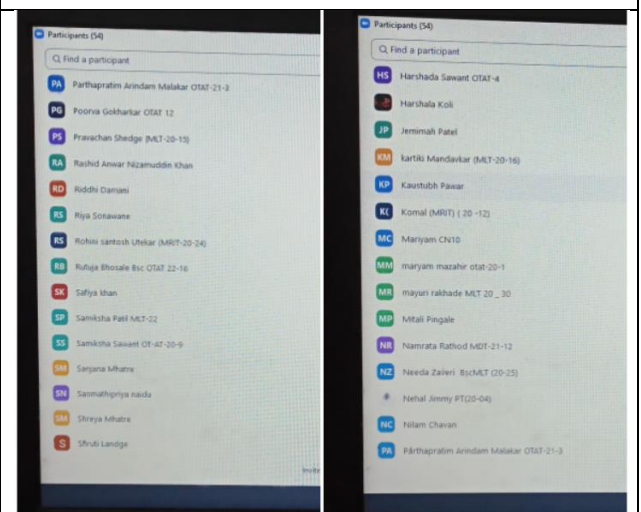

What is cancer ?

- The body is made of up of trillions of living cells (जीवकोष)
- Normal cells grow, divide to make new cells and die in an orderly manner
- In cancer the cells multiply in a haphazard and uncontrolled manner to form abnormal cells
- A disease caused by an uncontrolled division of abnormal cells in a part of the body

Loss of Normal Growth Control

Normal cell division: Normal cells grow, divide to make new cells and die in an orderly manner. Cell growth is controlled by checkpoints: Stop reaction, Inhibit division, Hold division, Further slow reaction.

Cancer cell division: Cancer cells multiply in a haphazard and uncontrolled manner to form abnormal cells. Uncontrolled growth.

WEBINAR ON CERVICAL CANCER AWARENESS MONTH was conducted on **22ND January 2022** by MGM **SBS National Service Scheme (NSS UNIT)** which was attended by total 78 student. Conference was about **Creating awareness** about **Cervical cancer** by solving myths, telling Symptoms, diagnosis and treatment of it. There were 2 Speakers which were **Dr. Daxa** (Indian Cancer Society) and **Dr. Sabrina** (Gyanc – MGM College & Hospital). They also solved queries of students.

Report Prepared by:- NSS P.O. Mrs. Anamika Chalwadi
